

BRI, A Frontage Company, is a Contract Research Company (CRO) located in Vancouver, BC with a head office located at Exton, Pennsylvania. BRI specialize in bioanalytical LC/MS/MS, In-vitro / In-vivo Drug Metabolism / Pharmacokinetics and drug product pre-clinical and clinical development in Canada, USA, Europe and Japan.

We are seeking highly motivated team players that enjoy the fast pace, self-learning and highly regulated environment of a CRO.

Position: Senior Scientist – Bioanalytical

Qualification:

- B.Sc, M.Sc. or Ph.D. in pharmaceutical sciences, bioanalytical chemistry, or related organic analytical chemistry
- A 5+ years hands on experience with bioanalytical assays for quantitation of small molecule and large molecule in biological samples plus a minimum of 2 years supervisory experience
- Understanding of experimental design and planning, data collection and analysis software
- Hands on experience on Waters or Sciex LC/MS/MS
- Demonstrated ability in development and validation of bioanalytical assays
- Experience in working GLP environment
- Demonstrated problem-solving and troubleshooting abilities
- Strong written and verbal communication skills.
- Strong planning and organization abilities.
- Competent and self motivated individual able to work independently.

Duties:

- Responsible for overall bioanalytical study conduct, timeline, and communications
- Communicate project timelines, status, and data to Principle Investigator effectively addressing any issues that may arise
- Develop and validate unique bioanalytical assays for TK/PK assessment
- Ability to work on multiple projects at the same time
- Perform high-volume sample analysis, data analysis, data QC, and data interpretation
- Aid in the preparation of study summaries and/or reports
- Help with training and/or mentoring of junior scientific staff
- Ensure that GLP regulations and SOPs are followed
